If you make a plan with the full realization that it's going to change, is it really a plan at all? You bet it is.

Agile planning might sound a little backward because agile focuses on iterative development. In fact, I have heard some people say that agile project management can't be planned, but these people are misguided (and likely just trying to get out of doing *any* upfront work)!

Even though agile is rooted in being open to change and pivoting when we
